

To whom it may concern,

It's my pleasure to provide this letter of recommendation for Ahmed Elmahy as he seeks new research opportunities. I have worked closely with him over the past two years. Ahmed showed excellent communication skills and amazing personality.

Ahmed has a very strong grasp of technology. His computer and problem solving skills are very promising. I have supervised him in the clinical study "**Development and Validation of Liver Cancer Autoantibody Assay**" prepared by Egybiotech company for Oncimmune UK.. He designed and maintained a database for the project.

Ahmed is one of the most dedicated and passionate research assistants among the team. He has always showed extreme interest in research, particularly cancer related projects which led us to choose him to join Alexandria Cancer Research Cluster.

Ahmed has always been very up to date and eager to discuss the newest in the field of cancer. Moreover, I always saw marked potential in him and I believe he will excel in any field he chooses.

Ahmed has my highest recommendation for your program. He has demonstrated excellence in all that he puts his mind to, whether it's designing an experiment, collaborating with others, or teaching himself new ideas. Ahmed's endless curiosity, combined with his willingness to take risks, leads me to believe there will be no limit to his growth and achievements.

Best Regards
